

Never survive

I've got a wish, I've got a dream
To change the world as it may seem
I promise you that I will play
Againsts your chess againsts your cheats
I'll fight all the way
I'll fight your elite
But I'm sure I'll never survive

I'm writting all these lines to you
The one that's blind and sees no blue
For that old book under the shelf
For that old man who doesn't hear
To express myself
And the darkness here
But I'm sure I'll never survive

I know the price to dance the jive
I hope I am done with my life
And I don't care, I want to dive
Even though I may be derived
And death will arrive
I won't stop the drive
And I'm sure I'll never survive.
